

H003-C

Suction unit 1 L

Portable phlegm suction unit is the new generation oil-free phlegm suction unit with negative pressure pump. It can suck thick liquid such as pus-blood and phlegm inside human cavity. It may be used in operation rooms of medical organizations, or for patients having difficulty in expectorating independently due to disease or coma. It is the common medical equipment in emergency room, operation room, ward room monitoring and home nursing.

Structure Characteristics

- √ Oil-free piston pump helps to keep from oil mist pollution.
- √ Plastic panel makes it resistant from water erosion.
- √ Overflow valve helps to prevent liquid from flowing into pump.
- √ Negative pressure is adjustable according to requirements.

Main Technical Specifications

- Suction pump Piston pump
- Ultimate negative pressure $\geq 0.075\text{MPa}$
- Regulating scope of negative pressure $0.02\text{MPa} \sim$ ultimate negative pressure value
- Air exhausting speed $\geq 18\text{L}/\text{min}$
- Reservoir 1000ml, 1pc
- Power supply AC220V / 110V, 50Hz / 60Hz
- Input power 90VA
- Noise $\leq 65\text{dB(A)}$
- Dimension 335mm \times 150mm \times 240mm
