MATERIAL

Our Fiber optic laryngoscope blades are manufactured from a high quality AISI 304 stainless steel Steel Melt Type which is highly resistant to corrosion. The bulb is in the handle, blade can be sterilized at 134 °C; All blades and handles are removable and interchangeable with other blades of the same size.

APPLICATION

Bulb anesthesia laryngoscope is used to expose the airway during endotracheal intubation under general anesthesia, used in conjunction with a ventilator or anesthesia machine. Different models are available for different sizes of animals.

OPERATING INSTRUCTIONS

1. Engage the blade by aligning the slot of the blade on to the hook pin of the handle and apply a sufficient force (~1lb) as shown in Fig.1.
2. Apply force upward to bring the blade into operating position as shown in Fig.2.
3. To bring the blade into standby position apply force downward as shown in Fig.2.
