

PORTABLE, X-RAY UNIT MODEL DM-100P

DESCRIPTION

DONGMUN Portable X-ray Units are intended for heavy-duty operation, performing all basic radiographic procedure for small hospitals, satellite departments of large hospitals, clinics, private practices, dental, veterinary, bed-side diagnosis and emergencies.

FEATURES

- The adjustable output gives the advantage in taking X-rays of parts in a shorter time.
- Electronic timer provides accurate radiographic exposure time.
- The self-contained high tension transformer with lead lining is for radiating protection.
- Special version collimator is supplied.
- Household socket(wall outlet) is usable for the unit.

SPECIFICATION

		DM-100P
Rating	mA	30, 25, 20, 15, 10
	kVp	60, 70, 80, 90, 100
Tube	Stationary anode	
Filament	Preheat	
Rectification	Self-Rectified	
Timer	0.03-0.5 sec(23 Steps)	
Collimator	AC12V, 40W, sid 650mm, 300×300	
Exposure switch	Two steps	
Voltage control	Manual line Voltage Compensation	
Display	Analog	
Power supply	110V, 220V, 50/60Hz Single phase	
Net weight	18kg	
Dimensions	230mmW×175mmD×225mmH	
Components	X-Ray control High tension unit Power cord Exposure cord Carrying case Mobile supporting unit
